

The Magical Properties of Melanin

Melanin's Mystique

Conscience, Pineal Gland, Kundalini, Soul, Rhythm, and Awesome power. These are just some of the characteristics of dark matter consciousness (Melanin).

MELANIN'S RELATIONSHIP TO SPIRITUALITY

Historically, most people of color possess this quality called soul. Most have developed a system of salvation (religion) which is based on ancestral worship. The essence of ancestral worship is necromancy, or communication with the dead.

How does one communicate with the dead? It occurs naturally when you sleep. Every person alive has had a dream, at some time or another, in which they've spoken with a deceased relative or friend who offered them guidance or direction on problems they were facing.

How is it possible to see in your dreams? How is it possible to see with your two eyes closed? It is possible because when you sleep you see with your "inner eye." In some traditions this "inner eye" is called the "third eye," the eye of clairvoyance. Other traditions refer to this eye as the pineal glands.

It is when you are asleep that the pineal gland secretes the hormone melatonin (primarily during the hours of 2 a.m. to 6 a.m.) which literally bathes the brain, thus creating the chemical condition necessary for "inner vision" to take place.

The relationship between melatonin and spirituality is certainly nothing new. The revelations of the Bible, Torah, Koran and of the Buddah were all inspired by melanin-induced visions of people of color.

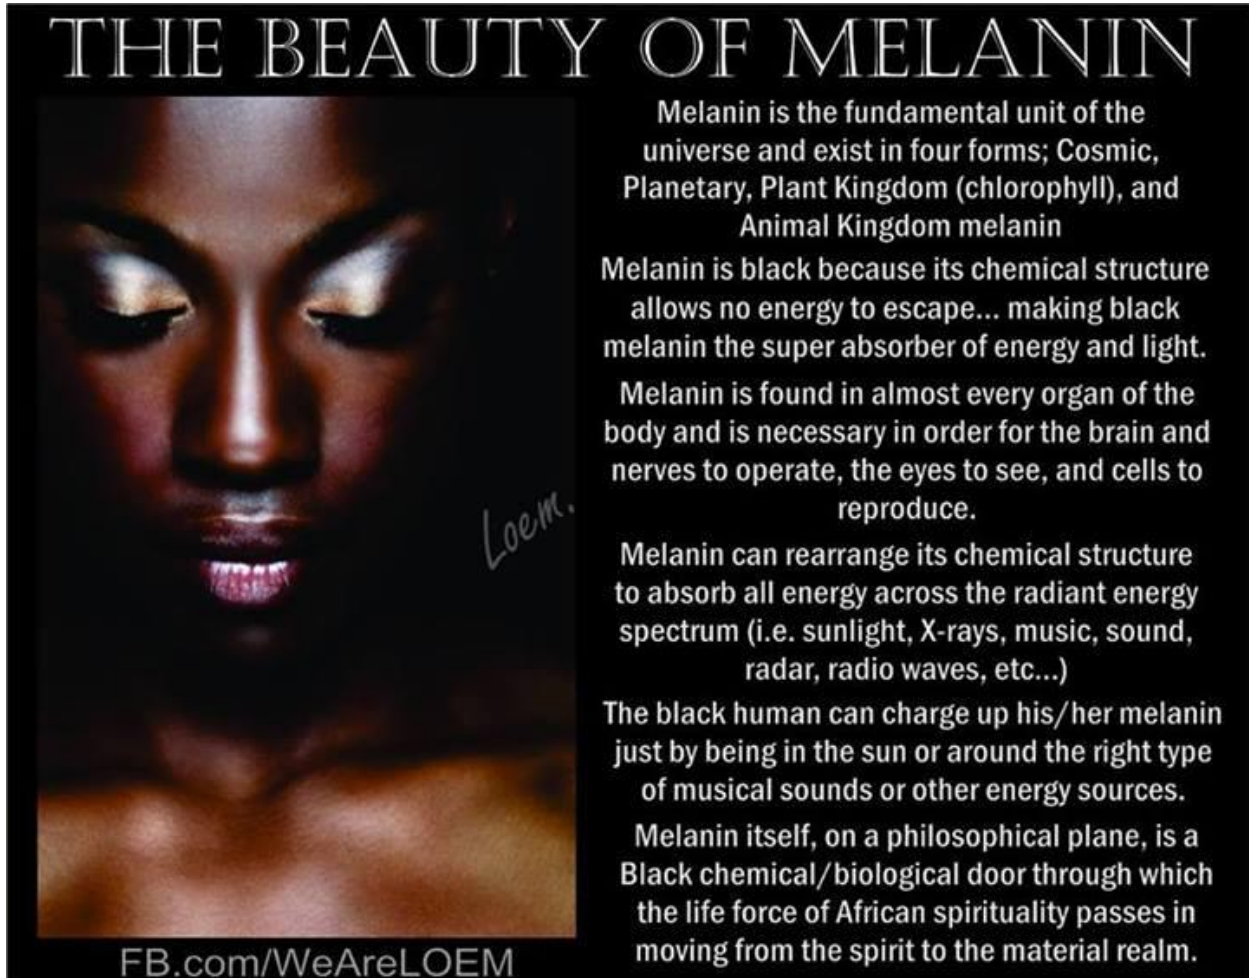

We cannot expect non-melanated people to explain to us, or even understand something which they themselves do not possess. This is all the more reason why the annual melanin conferences are of the utmost importance to people of color.

As our knowledge of melanin increases we will gain more insight into ourselves, both spiritually and physically. **BUT THE KEY IS THAT THE KNOWLEDGE MUST COME FROM US!** We must develop the scientists, sociologists, and institutions necessary to carry out the research to expand our understanding of melanin.....the key to life.

Source: "From the Browder File" by Anthony T. Browder.

It appears that Western culture, which enslaved the world, lacked this property (meaning melanin induced visions) in their culture. It's only sensible to suspect an aberration in their brains. No other culture has been as brutal to the world.

When you pattern yourselves after such a wicked creation, you set yourself up for failure because they lack the foresight to recognize that their time of world domination is close to its demise.

THE BEAUTY OF MELANIN

Melanin is the fundamental unit of the universe and exist in four forms; Cosmic, Planetary, Plant Kingdom (chlorophyll), and Animal Kingdom melanin

Melanin is black because its chemical structure allows no energy to escape... making black melanin the super absorber of energy and light.

Melanin is found in almost every organ of the body and is necessary in order for the brain and nerves to operate, the eyes to see, and cells to reproduce.

Melanin can rearrange its chemical structure to absorb all energy across the radiant energy spectrum (i.e. sunlight, X-rays, music, sound, radar, radio waves, etc...)

The black human can charge up his/her melanin just by being in the sun or around the right type of musical sounds or other energy sources.

Melanin itself, on a philosophical plane, is a Black chemical/biological door through which the life force of African spirituality passes in moving from the spirit to the material realm.

Yes, all people have melanin, but due to calcification of the pineal gland during the ice age or due to a genetic defect, melanin in some people is not fully functional. An indication of a non-melaninated person (due to calcified pineal gland or a genetic defect) is the lack of rhythm, spirituality, and consciousness.

These people can enslave other cultures and treat the human being as though they are a horse. They have **NO REMORSE** or **GUILT** behind **GENOCIDAL ACTIONS!**

All the past presidents of the U.S. would fit into this category.

Their actions **SPEAK** louder than theory!

Sad to say but the truth has been ignored by most Afrikan people.

They keep praying that non-melaninated people will change their evil ways. I'm here to say that **"IT AIN'T GONNA HAPPEN!"**

Melanin is a change agent and they have a deficiency of this polymer (substance composed of macromolecules/biological structure and function, such as DNA).
